EDUCATION

UiPath Certified RPA Associate

(Jan 2025)

Obtained certification and continuing to develop expertise in Robotic Process Automation (RPA).

RPA Development Bootcamp

Artikeys Academy

(August 2024 - December 2024)

Frontend Development: HTML, CSS, JavaScript (1 month)

Backend Development: ASP.NET Core MVC, C#, SQL (1 month)

RPA Development: UiPath methodology, process automation (3 months)

BSc Software Engineer

Hashemite University (2020 - 2024)

HARD SKILLS

- Proficiency in RPA tool (UiPath)
- ASP.NET MVC, HTML, CSS, JavaScript, and Bootstrap for web development.
- SQL and Entity Framework for database management and design.
- Understanding of version control systems (Git)
- Debugging and testing

SOFT SKILLS

- Eagerness to learn and implement new technologies.
- Planning and organizational skills
- Openness to constructive feedback
- Logical and analytical thinking

PROFILE SUMMARY

Full Stack Developer and RPA Specialist, a recent graduate with hands-on training in designing and developing comprehensive web applications and implementing automation solutions to streamline workflows and enhance efficiency. Completed intensive training in integrating automation to optimize business processes and save time. Passionate about leveraging innovative technologies to solve complex problems and support business objectives. Eager to collaborate with cross-functional teams to deliver impactful solutions that drive organizational success. Finally I am passionate about learning new things

PROJECTS

RPA Project - Research Copy of Check

- Developed an RPA solution using UiPath to automate the "Research Copy of Check" process for ACME Systems Inc. The automation involved extracting client and check details from PDFs, performing searches across multiple systems, and uploading check copies. This solution streamlined daily operations, reduced processing time, minimized manual errors, and enhanced overall efficiency.

RPA Project -Calculate_Client SecurityHash

- Robotic Process Automation (RPA) for Security Hash Calculation
- This automation involved extracting client information, generating security hashes using an external SHA1 website, and updating the status in the system with minimal human intervention. The solution enhanced accuracy, reduced processing time, and achieved 100% automation for repetitive tasks.
- [Calculate_Client_Security_Hash.git](#)

Full-Stack Web Application - Mami Zone

- Designed and developed a comprehensive platform for mothers, featuring articles, workshops, events, and consultations. Utilized .NET Core MVC for backend development and Bootstrap for responsive design. The project includes an admin management system for content
